Day 2 | Morning

Thursday 26 October, 2017

8:00  Welcome coffee

9:00  Turning disruption into innovation: emerging business models
The session will discuss enterprise opportunities in customisation and manufacture-on-demand, where entrepreneurs are exploiting B2C and B2B channels to create new levels of consumer engagement.

- Tansy Fall, Editor - Industry Digitalisation, WTIN
- Yariv Bustan, Vice President - Product and Marketing, Twine Solutions
- Michel Byvoet, CEO & Founder, BIVOLINO

Presentations followed by panel discussion

10:15  Innovation commercialisation: Priorities for investment in the Industry 4.0 space
As small companies transition from research to commercialisation in industry 4.0: What are the milestones that are involved in surviving this transition? This session also looks at the typical technology funding cycle, technology commercialisation tunnel and existing trends in Industry 4.0 innovation start-up investment.

Konstantine Karczmarski, CEO, CLMI Ventures

10:30  Networking break | Sponsored by oerlikon

11:00  Practical guide to optimising your supply chain through analytics and change management
This session will look at new sources of data: saviour or more complexity, key business problems and how new analytics help organisations solve these and key success factors to roll out such transformation.

Fred Lemoine, Managing Director Asia, Weave Consulting Services

11:30  The Analytics of Things: creating value from big data
How do we intelligently and securely transmit and keep only what is necessary for the analysis we need to do? This session will focus on how technology can increase productivity, reduce operational cost and inventory levels.

- Jamie Potter, CEO and Co-founder, Flexciton
- Anna Mette Hoyer, Head of Business Relations – IoT Predictive Maintenance & Asset Intelligence, SAP

Presentations followed by panel discussion

12:40  Lunch break
